TRANSACTIONS

OF

THE OPTICAL SOCIETY.

VOL. XVIII.

JANUARY TO JUNE, 1917,

WITH EXHIBITION SUPPLEMENT.

PUBLISHED BY THE OPTICAL SOCIETY,
39, VICTORIA ST., WESTMINSTER, S.W. 1.

CONTENTS OF VOL. XVIII.

PAGE

More Notes on Glass Grinding and Polishing. By James Weir French, B.Sc. . . 8

A Simple Method of Determining the Size of the Tool required for a given Block of Lenses. By C. L. Redding 56

A Variable Angle Collimator. By T. F. Connolly, M.Sc. 62

Light Filters for Eye Protection. By L. C. Martin, A.R.C.Sc. 73

Note on Accuracy of Observation and Precision in Measurement. By G. A. Carse, M.A., D.Sc. 114

A Simple Proof of the Expression for the Focal Power of a Thick Lens. By Charles Cochrane, M.A., B.Sc. 120

First Approximation Relations in Centred Optical Systems. By S. D. Chalmers, M.A. 122

On the Design and Testing of Telescope Objectives. By P. F. Everitt, B.Sc. . . 142

Principles and Methods of Calculating Telescope Objectives. By T. Smith, B.A. . 160

Calculation of Telescope Objectives free from Chromatic and Spherical Aberrations. By S. D. Chalmers, M.A. 183

The Eye in Relation to Practical Lighting Problems. By J. S. Dow 215

Aeroplane Compasses. By S. G. Starling, B.Sc., A.R.C.Sc. 221

An Optical Method for Accurately Dividing a Circle into Degrees. By Dr. R. S. Clay 237

Exhibition of Workshop Methods of Optical Testing 15

INDEX TO VOL. XVIII.

References to Abstracts are given in *italics*.
The pages in the Supplement are marked 1S, 2S, etc.
For Index of Subjects in Supplement, see p. 52S

PAGE

Abstracts 49, 51, 53, 68, 69, 70, 138, 139
Accuracy of Observation and Precision in Measurement. By G. A. Carse . . . 114
Aeroplane Compasses. By S. G. Starling 221

Ball & Co., T. H., Apparatus for Testing Signalling-Mirrors 1S
Bergholm, Carl, Double Refraction in Metallic Films by Kathode Volatilisation . . 68

Cambridge Scientific Instrument Co., Ltd., Screw-Measuring Machine . . . 2S
———— Workshop Reading Microscope 3S
Carse, G. A., Note on Accuracy of Observation and Precision in Measurement . . 114
Chalmers, S. D., Apparatus for the Measurement of Curvature of Test Plates . . 5S
———— Apparatus for Measuring the Curvature of Shallow Curves and for Measuring Differences of Curvature 6S
———— Calculation of Telescope Objectives free from Chromatic and Spherical Aberrations 183
———— First Approximation Relations in Centred Optical Systems . . . 122
———— Instrument for Testing the Angles of Prisms 6S
———— Test Plates 7S
Chance Bros. & Co., Ltd., Wave Plates for the Rapid Approximate Assessment of Double Refraction in Glass 7S
Circle, An Optical Method for Accurately Dividing a. By R. S. Clay 237
Clay, R.S., An Optical Method for Accurately Dividing a Circle into Degrees . . 237
———— Apparatus for Testing Binocular Glasses 9S
———— Instrument for Measuring the Refractive Index of a Liquid 9S
———— Instrument for Measuring the Refractive Index of a Transparent Solid . 9S
———— Telescopic Method for Determining the Principal Curvatures of a Nearly Flat Surface 12S
Cochrane, Charles, A Simple Proof of the Expression for the Focal Power of a Thick Lens 120
Collimator, A Variable Angle. By T. F. Connolly 62
Colour, New Researches on the Theory of. By W. Ostwald 138
Colours, Absolute System of. By W. Ostwald 138
Compasses, Aeroplane. By S. G. Starling 221
Connolly, T. F., A Variable Angle Collimator 62
Cussons, Ltd., G., Dioptriemeter 13S

Dorsey, N. E., Luminescence Measurements 139
Dow, J. S., The Eye in Relation to Practical Lighting Problems 215

PAGE

Edison & Swan United Electric Light Co., Pointolite Lamp 15S
Everitt, P. F., On the Design and Testing of Telescope Objectives 142
Exhibition of Workshop Methods of Optical Testing 1S
Eye in Relation to Practical Lighting Problems. By J. S. Dow 215

Filters for Eye Protection, Light. By L. C. Martin 73
Focal Power of a Thick Lens, Expression for. By Charles Cochrane 120
French, James Weir, More Notes on Glass Grinding and Polishing 8

Glass Grinding and Polishing, More Notes on. By James Weir French 8

Hilger, Ltd., Adam, New Apparatus and Process for the Finishing of Prisms and Lenses or Combinations of the Same 15S
Hnatek, A., Automatic Mechanism for Winding-up Telescope Clockworks . . . 139
Hughes & Sons, Ltd., Henry, A Measuring Microscope for Workshop Purposes . . 15S
———— Shallow Curves Measured by Newton's Rings 18S

Jackson, Prof. H., The Pulfrich Refractometer 19S
———— Weathering Test on Glass 21S
Jamin Refractometer with Spectrophotometer, Combination of. By N. Posejpal . . 69

Kerber, A., A Portrait Objective with Three Separated Lenses 49

Lens, Expression for the Focal Power of a Thick. By Charles Cochrane . . . 120
Lighting Problems, The Eye in Relation to Practical. By J. S. Dow 215
Luminescence Measurements. By N. E. Dorsey 139

Martin, L. C., Apparatus for Determination of Refractive Index by Immersion . . 21S
———— Light Filters for Eye Protection 73
Meetings 1, 2, 7, 55, 71, 72, 141, 219, 220
Ministry of Munitions, Optical Department, Apparatus for Testing Parallax in Telescopic Sights for Rifles 27S
———— Eyepiece for Testing the Squaring-on of Telescope O.G.s . . . 24S
———— Focometer for Measuring Back Focal Lengths, as designed by Zeiss . 26S
———— Microscope Focometer 25S
———— Polariscope 29S
———— Testing Parallelism in Prismatic Binoculars 27S

National Physical Laboratory, Apparatus for the Commercial Testing of the Refractive Properties of Optical Glass 21S
———— Luminosity Tests of Radium Painted Dials 24S

Objective, Portrait, with Three Separated Lenses. By A. Kerber 49
Optical Method for Accurately Dividing a Circle into Degrees. By R. S. Clay . . 237
Optical Science, British 49, 51
Optical Systems, First Approximate Relations in Centred. By S. D. Chalmers . . 122
Ostwald, A., Absolute System of Colours 138
———— *New Researches on the Theory of Colour* 138

PAGE
Penrose & Co., Ltd., A. W., Quartz Spectrographic Apparatus 31S
———— Spectroscopic Camera 29S
Personal Notes of Members 54
Polishing, More Notes on Glass Grinding and. By James Weir French . . . 8
Posejpal, N., Combination of a Jamin Refractometer with a Spectrophotometer . . . 69
Precision in Measurement, Note on Accuracy of Observation and. By G. A. Carse . 114

Raphael's, Ltd., Lens Measure 33S
———— Optical Bench 32S
Redding, C. L., A Simple Method of Determining the Size of the Tool required for a given Block of Lenses 56
Refraction, Double, in Metallic Films by Kathode Volatilisation. By Carl Bergholm . 68
Ross, Ltd., Large Polariscope for Testing Optical Glass for Internal Strain and Determining the Presence of Striae 33S

Shackleton, Wm. S., Silvering Glass Mirrors 34S
Smith, T., Principles and Methods of Calculating Telescope Objectives . . . 160
Spectrophotometer, Combination of a Jamin Refractometer with a. By N. Posejpal. . 69
Spherometer with Worn Feet 70
Starling, S. G., Aeroplane Compasses 221

Talbot's Observations on Fused Nitre 53
Telescope Clockworks, Automatic Mechanism for Winding-up. By A. Hnatek . . 139
Telescope Objectives free from Chromatic and Spherical Aberrations. By S. D. Chalmers 183
Telescope Objectives, On the Design and Testing of. By P. F. Everitt . . . 142
Telescope Objectives, Principles and Methods of Calculating. By T. Smith . . 160
Tinsley & Co., H., Apparatus for Testing the Magnification, Field of View, and Illumination of Field Glasses or Small Telescopes . . . 37S
———— Binocular Parallelism Tester 38S
———— Definition Tester 39S
Tool for Block of Lenses, A Simple Method of Determining Size of. By C. L. Redding 56
Troughton & Simms, Ltd., Micrometer Theodolite 40S

Uni-Bifocal Co., Ltd., Micrometers, etc. 40S

Watson & Sons, Ltd., W., Apparatus for Rapid Comparisons of Focal Lengths . . 43S
———— Determination of Curvature of Polished Surfaces by the Microscope . 44S
———— Glass Discs as Primary Standards of Curvature 41S
———— Micrometer for Measuring the Separation of Microscope Lenses . . 42S
———— Micrometer for Measuring the Thickness of Large Lenses . . . 42S
———— Prism Testing Machine 41S
———— Ring Spherometer 43S
Woolwich Inspection Department (D.I.O.S.), Apparatus for Testing Azimuth Angles . 51S
———— Digester for Testing Suitability of Glass to Withstand Atmospheric Deterioration 49S
———— Iron Plate for Testing Definition and Colour Correction . . . 48S
———— Machine for Testing and Adjusting the Parallelism of Binoculars . . 45S
———— Piece of Scale for Testing Angles 45S
———— Polariscope for Testing Strain in the Prism of a Binocular . . . 49S
———— Simple Instrument for Testing the Sensitiveness of Bubbles . . . 45S
